INTRODUCTION

American Council for Construction Education (ACCE) is a 501(c)(3) private non-profit corporation. The mission of ACCE is to be a leading global advocate of quality construction education; and to promote, support, and accredit quality construction education programs. The primary goal is the promotion and continued improvement of postsecondary construction education. Specifically, ACCE’s primary focus is to accredit construction education programs in colleges and universities that request its evaluation and meet its standards and criteria.

ACCE was organized in 1974 by the American Institute of Constructors (AIC), the constructor’s professional organization, and the Associated Schools of Construction (ASC). ACCE enjoys the support of these two associations and many North American building and contracting associations and academic institutions seeking to satisfy the needs for highly qualified entry-level management personnel in the construction profession.

The Council for Higher Education Accreditation (CHEA), based in Washington, DC, provides oversight of ACCE as the accrediting agency for the four-year baccalaureate degree, two-year associate degree, and master’s degree programs in construction science, construction management, and construction technology programs. There are 95 accredited degree programs in the United States and Canada. This past year, we granted initial accreditation to five-degree programs, with another 13 programs in their initial accreditation review process. In October 2022, CHEA will approve the recognition of ACCE for seven more years.

Based on the requests from our industry constituents, ACCE offers a Professional Development Certification (PDC) Program. This program aims to recognize industry-related professional development training provided by educational institutions, industry associations, and private companies that meet ACCE criteria for certification.

Also, based on our industry requests, ACCE has recently completed the development, implementation, and execution of an accreditation process for Construction Workforce Education (CWE) programs, otherwise known as skilled workforce training, conducted by trade unions, colleges and universities, industry associations, and private industry organizations. The Denver-based Western States College of Construction and its five trade programs are the first groups of ACCE-accredited workforce training programs. Two additional workforce training centers have applied for their candidacy for accreditation.

ACCE has developed reciprocal agreements with the National Board for Construction Management Accreditation (NBCMA) of the People’s Republic of China and The Chartered Institute of Builders (CIOB) in the United Kingdom. These agreements recognize university degree programs accredited by NBCMA and CIOB as equivalent to Baccalaureate Degree Programs or Associate Degree Programs accredited by ACCE and the same equivalency for NBCMA and CIOB accredited Degree Programs. In addition, we are revising our Standards and Criteria to serve our international partners better so that ACCE can accredit them.

By working together under the aegis of ACCE, representatives of the entire construction community and the public at large, construction educators and constructors establish and maintain standards and criteria for accreditation, provide guidance to those seeking to achieve accredited status, and carry out the accreditation and reaccreditation processes. In doing so, ACCE serves potential students’ interests by helping them identify Institutions and Construction Degree Programs that offer quality education in construction management and technology. It also serves the industry’s interests by enabling employers to identify graduates from construction workforce education programs who, because of their hands-on education, have the potential to make lasting contributions to the industry and their profession.

Steve Nellis, President & CEO
Since 1974, the American Council for Construction Education has been a leading global advocate that promotes, supports, and accredits quality construction education programs.
We successfully held our Midyear Conference in February despite challenging weather and COVID-19 complications. Steve organized this Conference as the inaugural Construction Education Consortium (CEC), combining the American Institute of Constructors (AIC) and the National Association of Women in Construction (NAWIC) along with their Education Foundation (NEF) with the ACCE Midyear Conference. The CEC event allowed for shared participation, networking, and cost-sharing for all groups.

During the Midyear Conference, the Industry Liaison Committee held another successful Industry Advisory Board (IAB) meeting, drawing newcomers from near and far to learn ways to become more vigorous advocates for their affiliated Construction Education Programs.

Many thanks to Dr. Tony Lamanna from Arizona State University and Professor Tom Leathem from Auburn University for providing the teaching workshop during our Midyear Conference. The workshop allowed educators to sharpen and enhance their instructor and pedagogy skills.

In July 2022, we held a successful Annual Conference in Minneapolis. As a result, the Board approved a standardized seven-year accreditation period for initial accreditation and reaccreditation actions for all Programs unless a three-year accreditation period was warranted. The new accreditation period will be effective with accreditation actions approved at the February 2023 Midyear Board Meeting.

The Board also approved measures to pursue recognition by the Department of Education. This recognition will allow ACCE to expand our opportunities within the Construction Workforce area. We were joined by new participants interested in learning more about ACCE and how we may be able to further our reach with additional programs, both academic and workforce skills alike.

The Board approved the 2023 operating budget and new fee schedules, which have been long overdue. In addition, the Board elected new members, accreditation actions were voted on, and changes to the standards were discussed. Several task forces were announced to keep ACCE moving forward and growing. Thanks to Dr. Khalid Siddiqi for leading the charge to update and maintain our Strategic Plan relevant to our growing and changing needs while ensuring that meaningful metrics are adopted. Notably, a task force was charged with investigating CHEA requirements and their impact on ACCE in the area of DEI compliance and providing feedback on how we can best meet the new requirements. Another task force, to be chaired by Dr. John Schmidt, will look into the opportunity to accredit other construction-related degree programs, such as Facilities Management and Concrete Industry Management. Dr. Tony Lamanna was encouraged to pursue a comprehensive Teaching and Learning Practitioner (TLP) program.

On behalf of the Board of Trustees, it gives me great pleasure to present the ACCE Annual report for 2022. I am happy to announce that despite another challenging year for our industry, ACCE remains stronger than ever and is increasing our sphere of influence within our goal to ensure excellence in construction education. Our continued growth is primarily due to the incredible passion and commitment of our President, Steve Nellis. With Steve’s tireless dedication to leading ACCE into broader opportunities to influence construction education, ACCE is poised to thrive. In addition, we remain grateful to the countless volunteers from industry, associations, and academics who selflessly commit their time to support our shared vision and goals.
Finally, the Construction Workforce Education (CWE) Committee has agreed to work with our previously accredited apprenticeship programs and its school, the Western States College of Construction (WSCC), to secure our Department of Education recognition.

Also, in July, CHEA notified us that the Committee on Recognition is recommending to the CHEA Board of Directors that ACCE be awarded continuing recognition for a term of seven years ending on December 31, 2029. The CHEA Board will act on this recommendation at its October 3, 2022, meeting.

2022 has been a busy year. As a result, several changes in our leadership will be effective in 2023. First, we thank Dr. Charlie McIntyre for his long tenure as Chair of the Industry Liaison Committee and Ms. Susan Labas as co-chair. Both have organized and delivered highly valued IAB events for more than ten years. We also thank outgoing treasurer Pam Dullum for her efforts to standardize the quarterly financial reports and work with the President to maintain financial integrity in our books and accounts. Finally, Dr. Richard Burt has served ACCE for the past four years as our Secretary of the Board of Trustees and did a marvelous job of keeping the records of our high-level meetings organized and accurate.

We also welcome our new Treasure, Professor Mike Anderson from California State University, Sacramento, and our new Secretary, Dr Mike Jackson from Clemson University.

Thanks to the following ACCE Committee and Task Force Chairs for serving in their respective leadership roles:
- Dr. Chris Gordon, Accreditation Committee
- Mr. Rogers Hunt, Awards and Scholarships Committee
- Dr. Souhail Elhourar, Council of Chairs
- Mr. Bill Good, Construction Workforce Education Committee
- Dr. Robert Ries, Guidance Committee
- Mr. Paul Mattingly, Industry Liaison Committee
- Dr. John Schaufelberger, Leadership Development Committee
- Ms. Joy Svoboda, Marketing and Communications Committee
- Ms. Tammy Crooks, Professional Development Committee
- Dr. Charles Berryman, Standards Committee
- Dr. Albert Bleakley, Training Committee
- Mr. Marty Garza, Learning Management System Task Force
- Dr. Tony Lamanna, Teaching and Learning Practitioner Taskforce
- Dr. Khalid Siddiqi, DEI Taskforce

It is an exciting time at ACCE, with many opportunities in front of us. We look forward to an even stronger 2023. With great thanks, we recognize the commitments of all volunteers who keep ACCE in a leading role in construction education. I personally want to thank President Steve Nellis, Past Chair John Schaufelberger, and my Vice Chair, Dr. Khalid Siddiqi, for their continued patience, support, and mentoring to provide ACCE with a bright future.

Sincerely,

Charlie Roessett
ACCE serves the interest of potential students by helping them identify institutions and programs that offer quality education in construction. Students graduating from ACCE accredited programs are better prepared to enter the construction industry.

Through ACCE involvement, faculty have opportunities for developing leadership, networking with peers, developing classroom teaching skills and keeping current with trends in construction.
In 2021, ACCE expanded its mission to include accreditation of Construction Workforce Education Programs which combine on-the-job work experience with classroom study to teach construction-related skills, methods, terminology, and other pedagogical topics to individuals to enhance their ability to perform construction-related work in a professional, safe, and quality manner.

In early 2020, a proposal was submitted by the Rocky Mountain Mechanical Contractors’ Association (RMMCA) for ACCE to include workforce education programs in their accreditation process. At the 2020 Annual Meeting, the ACCE Board of Trustees established the Construction Workforce Education (CWE) Committee with the goal of developing an accreditation process for construction workforce programs, such as apprenticeship programs, to recognize the importance of those programs in the realm of construction education. During 2020 and 2021, these standards, with an initial focus on Registered Apprenticeship Programs (RAPs), were created and approved. The Western States College of Construction (WSCC) and their Registered Apprenticeship Programs were the first pilot program to test the new standards. The site visit occurred in the Fall of 2021 and the Board accepted the recommendation of the visiting team to accredit WSCC and its RAPs in December 2021.

There are a variety of Construction Workforce Education Programs. To enter this space, the Construction Workforce Education Committee started by creating standards for accrediting apprenticeship Institutions that have one or more RAPs in good standing with the US Department of Labor Office of Apprenticeship (OA).

ACCE hopes to expand the accreditation of Construction Workforce Education Programs beyond RAPs.
Following a rigorous process and for the first time in the history of ACCE, the Western States College of Construction (WSCC) has received accreditation for apprenticeships in skilled trades. With eight campuses across Colorado and Wyoming, WSCC provides the first step for individuals seeking a fulfilling and life-long career. Offerings include on the job training and certification in electrical, HVAC, pipefitting, plumbing and sheet metal.

WSCC’s Apprenticeship Programs are administered in accordance with The Fitzgerald Act of 1937, also known as the National Apprenticeship Act. The regulations under the Act governing apprenticeship programs, the Equal Employment Opportunity guidance and selection procedures, are documented in the U.S. Code of Federal Regulations at Title 29, CFR Parts 29 & 30. WSCC Apprenticeship Programs are Joint Apprenticeship Training Programs jointly administered by construction employers and construction labor unions.

WSCC’s mission is to provide education beyond the secondary level. Each of their Programs is a Registered Apprenticeship Program (RAP) in good standing with the US Department of Labor as outlined in 29 CFR Part 29. WSCC’s RAPs have been serving the local population since 1988.

WSCC was formed through a unique collaboration of the Rocky Mountain Mechanical Contractors Association, Rocky Mountain Chapter of the National Electrical Contractors Association, the United Association of Plumbers, Fitters, Welders, and Service Technicians, the National Electrical Contractors Association, the International Brotherhood of Electrical Workers, the Sheet Metal and Air Conditioning Contractors of North America Colorado Chapter, National Association, and the International Association of Sheet Metal, Air, Rail & Transportation Workers and construction contracting companies.
As part of its mission to be a leading global advocate of quality construction education, ACCE offers a Professional Development Certification Program. The purpose of the program is to recognize industry-related professional development programs offered by Educational Institutions, industry associations, and private companies that meet ACCE criteria for certification. Certification standards and application procedures can be found on the Professional Development Certification page of the ACCE website.

ACCE accreditation enables employers to identify quality employees who, by education, have the demonstrated ability to make lasting contributions to their organizations and their profession.
A construction industry trade association, corporation, or an industry advisory board for an ACCE program that has an interest in supporting construction education programs may become a member of ACCE. Individuals who represent the member organization may participate and have influence into ACCE programs by becoming members of our Committees and Visiting Teams along with the opportunity to network with other industry members and academic leaders to promote quality construction education.
