

**ANNUAL
REPORT
2013 - 2014**

AMERICAN COUNCIL FOR CONSTRUCTION EDUCATION

The American Council for Construction Education (ACCE) is a 501(c)(3) private non-profit corporation. The mission of ACCE is to be a leading global advocate of quality construction education; and to promote, support, and accredit quality construction education programs. The primary goal is promotion and continued improvement of postsecondary construction education; specifically, ACCE accredits construction education programs in colleges and universities that request its evaluation and meet its standards and criteria.

ACCE is recognized by the Council for Higher Education Accreditation (CHEA) as the accrediting agency for both 4-year baccalaureate degree programs and two-year associate degree programs in construction, construction science, construction management, and construction technology. The Council offers accreditation for Master Degree Programs and Recognition of Continuing Education courses for Non-Degree Programs.

Organized in 1974 by the American Institute of Constructors, the constructor's professional organization, and the Associated Schools of Construction, ACCE enjoys the support of the principal building and contracting national associations and academic institutions seeking to satisfy the needs for well educated and trained entrants into the construction profession.

By working together under the aegis of ACCE, persons representative of the total construction community and the public at large, construction educators and constructors, establish and maintain standards and criteria for accreditation, provide guidance to those seeking to achieve accredited status, and carry out the accreditation and reaccreditation processes. In doing so, ACCE serves the interests of potential students by helping them identify institutions and programs that offer quality education in the field, and serves the interests of the industry by enabling employers to identify persons who, by reason of their education and training, have the potential for making lasting contributions to the industry and their profession. ACCE also serves the interests of owners/users of constructed facilities and the public at large by raising the professional caliber of constructors and thus the quality of the construction for which they assume responsibility.

ACCE has developed reciprocal agreements with the National Board for Construction Management Accreditation (NBCMA) of the People's Republic of China, the Canadian Technological Accreditation Board (CTAB), and The Chartered Institute of Builders (CIOB) in the United Kingdom. The agreements recognize university degree programs accredited by NBCMA, CTAB, and CIOB as equivalent to Baccalaureate Degree Programs or Associate Degree Programs accredited by ACCE and the same equivalency for NBCMA, CTAB, and CIOB accredited Degree Programs.

These agreements are the culmination of a long period of evaluation by all parties embracing academic standards' comparability, exchange of procedural information and reciprocal observation of accreditation visits.

NOTE:

Officers, Trustees, Committee and Task Force Leaders/Members are elected to terms from July 2014 to July 2015. Financials are for July 1, 2013—June 30, 2014

This year marked a milestone for ACCE with many changes being approved and implemented. First, the new By-laws were implemented.

This was a 3-

year project that culminated in a more representative board and a focus on the future. Board members are nominated by their constituencies – educators nominated educators – industry nominated industry practitioners. The Board has a stronger representation from industry and more involved Trustees from all stakeholders.

As a part of the new structure, the Board held its first strategic planning retreat in over 15 years.

Twenty-seven (27) people came to the DFW area and spent almost 2 days working through a facilitated workshop to develop a strategic plan for the next 5-10 years for ACCE. Now, the Board Committee on strategic planning will work with Board members and other ACCE members to keep on-track with the momentum built during that retreat. The Board is responsible for implementing the goals and tasks developed.

The Standards Committee has completed its work on the new Outcome-Based Assessment standards and processes which the Board of Trustees voted on at the July 2014 meeting. Pilot testing and full implementation will begin in the fall of 2015, culminating in full implementation by the fall

2016 time frame. Training for the new standards will begin at the February 2015 meeting for Advanced Members and VT Chair training will be held at the July 2015 meeting in Louisville, KY. All training from this time forward will be utilizing the new Outcome-Based Assessment standards.

The Fifth-Annual Industry Advisory Workshop was held in Tampa with continued success. The IAB Workshop continues to be a strength and support for our Industry partners and to the programs that benefit from the improved focus from industry.

ACCE awarded 1 scholarship in 2014: Mike Duff from TAMU, the second time for Mike. The National Housing Endowment/ACCE scholarship was not awarded in 2014; the Dupree Committee felt there were not any qualified applicants. Its responsibility from NHE is clear and as the steward of the NHE monies, ACCE held back any award. ACCE encourages all academics and practitioners in the residential construction industry to be more aware of this opportunity and to encourage qualified folks to apply for this generous scholarship. ACCE will increase its work with Greg Zick to publicize this scholarship opportunity through the NAHB student chapters. The Dupree scholarship program has continued to be a successful, albeit small program.

The Founder's Award was given to Turner Construction in Tacoma, WA this summer, Mike Kaiman and our own Bob Meyer

accepted the plaque for Turner; Mike is a Vice President for Turner. He was grateful for the recognition and has committed to make this a travelling trophy throughout Turner's operations across the country.

During the fiscal year of 2013-2014, the Accreditation Committee was busy reviewing 17 Visiting Team Reports (3 of which were new programs) and reviewed 32 progress reports.

We currently have accredited 74 4-year programs; 12 2-year programs; and 3-master degree programs, with 11 4-year and 6 2-year programs in candidate status and a master degree in process.

None of these accomplishments would have been possible without your enthusiastic support, vision, dedication and leadership. The groundwork has been laid that will prove beneficial to the future leaders of the construction industry. It is a pleasure to be a part of this organization at an exciting time. We have much work to do and I am extremely confident all of our goals will be reached. Thank you all for your continued support of our fine organization.

Respectfully submitted,
John F. Gaver
Board Chair, 2013-2015

A handwritten signature in black ink that reads "John F. Gaver". The signature is fluid and cursive, with the first name being the most prominent.

ACCREDITED

There are seventy-four baccalaureate degree programs, three masters degree programs, and twelve associate degree programs that are ACCE accredited in accordance with the standards and procedures. Shown are the parent institution, the program accredited, and the responsible faculty member as prepared by the programs. Standards and procedures by which these programs are evaluated for accreditation are found on the ACCE web site at www.acce-hq.org

ACCREDITATION CANDIDATES

There are thirteen baccalaureate degree and six associate degree candidate programs. The institutions where these programs are offered have all indicated their desire to work toward ACCE accreditation. However, these programs, although in various stages of the accreditation process, have not yet been evaluated for compliance with ACCE's standards and criteria. Shown are the parent institution, the construction program, and the responsible faculty member.

Non Degree Recognition

In response to the concept of quality education in construction, ACCE has created a recognition program For non degree, career related education programs from providers and programs. This effort to recognize the providers and programs which have a quality process and content is aimed at providing education other than skills training. Standards and procedures by which these providers and programs are evaluated for recognition are found on the ACCE web site at www.acce-hq.org under "About ACCE."
